

Microdermabrasion is a minimally invasive procedure that mechanically exfoliates the skin to improve skin tone and texture. By removing the dead cells on the surface of your skin, new cells appear and grow more rapidly, increasing collagen and elastin production. The additional benefits of microdermabrasion are that it has been shown to improve the appearance of fine lines, wrinkles, age spots, acne scarring, improves skin tone and texture, removes blackheads, unclogs pores and allows for better product penetration.

One treatment will provide you with a soft, smooth feel and glowing skin. Use this as a standalone treatment or add it to one of our signature facials for an added enhancement that your skin will thank you for!

Iron Out the Wrinkles – Microdermabrasion \$35

No starch needed here ladies! We've got the right tools to get you wrinkle free in no time. After a quick cleanse and analysis, we will use the power of diamonds and crystals to exfoliate and slough off those dead skin cells that prevent you from having a supple glow to your skin. You'll leave looking more vibrant, youthful and a little more ironed out.
